

72k.ch

- Artemisia C-08UC Complex® effectively relieves the symptoms of sun-stressed skin such as sunburn, inflammation, and redness
- With corrective anti-aging properties: Prevents UV-induced collagen degradation and loss of elasticity
- Optimum hydration thanks to hyaluronic acid and tocopherol (vitamin E)
- Prevents light-related damage such as pigmentation spots
- Water and sweat resistant
- Thanks to O/W emulsion (oil in water emulsion), the products are characterized by a particularly pleasant galenic and a dry-touch effect, they are not greasy and sticky
- Clinically and dermatologically tested. Vegan. Developed and produced in Switzerland

UVB: UVB rays can cause redness, burns, hyperpigmentation, and skin cancer, among other things.

UVA/pa++++: Provides very high protection against UVA radiation. In the long term, UVA rays lead to oxidative stress in the cells, which is responsible for DNA damage and light-related skin aging, so-called photoaging. This can lead to wrinkles, sagging of the skin, and loss of volume.

State-of-the-art light protection with Artemisia C-08UC Complex® and the latest UV filter technology. Reduces radiation-induced skin damage, protects against premature skin aging, and reduces the risk of skin cancer
