VIOCAP 72k Product Line

INCI's

Date: 04.12.2023

72k multi-talent spot serum (new certified organic)

Ingredients (INCI):

Aqua, Alcohol*, Glycerin, Artemisia Annu Extract*, Pentylene Glycol, Sodium Ascorbyl Phosphate, Artemisia Vulgaris Extract*, Artemisia Abrotanum Extract*, Malva Sylvestris Extract*, Alchemilla Vulgaris Extract*, Primula Veris Extract*, Leontopodium Alpinum Flower/Leaf Extract*, Achillea Millefolium Extract*, Melissa Officinalis Leaf Extract*, Veronica Officinalis Extract*, Pelargonium Graveolens Oil*, Citrus Paradisi Peel Oil*, Cananga Odorata Flower Oil*, Mentha Piperita Leaf Extract*, Xanthan Gum, Lactic Acid, Farnesol**, Geraniol**, Linalool**, Benzyl Benzoate**, Citronellol**, Citral**, Limonene**

* certified organic, ** part of natural essential oils

Explanation to the ingredients:

Aqua: We exclusively use water from the 'Adelboden' mineral springs. It's one of the highest springs in Europe, in the heart of the Swiss Alps. Our mineral water springs up far away from any environmental influences after a journey of several years through the rock layers of the untouched mountain world of the Swiss-Alps.

Alcohol: We use exclusively plant derived organic alcohol. We use alcohol as an extraction agent in the Artemisia Annu Extract.

Special use of alcohol in tonic and serum applications:

The name tonic comes from the term 'toning' and means increasing the tension of muscles, nerves and blood vessels. And that is exactly what we achieve with the 72k Tonic.

Alcohol opens up cell connections and penetrates the skin barrier. This improves the skin's absorption capacity. This makes it easier for subsequent ingredients from creams and serums to penetrate the skin and develop their full effect.

The positive property of alcohol is always used in combination with soothing and nourishing active ingredients, especially in toners. After toning, less subsequent care is required due to the improved absorption capacity.

Glycerin: Our Glycerine is plant derived and of organic quality. Glycerine is a humectant for creams and lotions. It conveys a pleasant, soft skin feeling. We use Glycerine also as an extraction agent in our Artemisia Annu Extract.

Artemisia Annu Extract: see webpage 72k.com

Pentylene Glycol: Pentylene Glycol is the ideal multifunctional ingredient that boosts the performance of active ingredients, moisturizes the skin, improves the sensorial profile of formulas and enhances product protection. Pentylene glycol natural is a polyvalent alcohol and has to bind therefore the quality water. This quality can be used to supply humidity to the skin. The skin is better soaked, looks clearly beaming and feels better.

Sodium Ascorbyl Phosphate: Sodium ascorbyl phosphate (SAP) is a stable vitamin C. It is an active ingredient for demanding cosmetic skin care products. It protects the skin, promotes its development and improves its appearance. Sodium Ascorbyl Phosphate (SAP) is a naturally occurring water-soluble derivative of vitamin C. It is the most stable form of vitamin C, which means it does not oxidize, making it a preferred choice for cosmetic formulations. It is more stable and bioavailable than magnesium ascorbyl phosphate (MAP), ascorbyl palmitate and ascorbic acid (among other vitamin C derivatives). It is an antioxidant that reduces oxidative stress by neutralizing free radicals, effectively slowing the aging process and slowing the formation of fine lines and wrinkles. SAP has the ability to penetrate the epidermis without causing irritation.

Artemisia Vulgaris Extract: is rich in antioxidants, which can help to protect the skin from damage caused by free radicals. Additionally, mugwort contains a compound called artemisinin, which has been shown to have antibacterial and anti-inflammatory properties. Sometimes the combination of Artemisia Annu and Artemisia Vulgaris is synergistic and of great use.

Artemisia Abrotanum Extract: In the dermis, the extract works by strengthening the collagen and elastin network through the prevention of proteases. Finally, representing the deepest layer of the skin, adipocytes treated with an aqueous extract of southernwood accumulate more triglycerides than their placebo treated counterparts. The combination of Artemisia Annu and Artemisia Abrotanum is synergistic and of great use.

Malva Sylvestris Extract: Because of its anti-inflammatory and antiseptic properties, mallow flower extract is especially helpful for treating acne and skin irritation. Research has shown that it can even help with eczema flare ups, psoriasis, and wound healing.

Alchemilla Vulgaris Extract: Lady's mantle extract is a valuable ingredient for skincare products due to its antioxidant, anti-inflammatory, and astringent properties. It can help to brighten the complexion, reduce inflammation, protect the skin from free radical damage, and cleanse the skin and tighten pores.

Primula Veris Extract: With anti-oxidant and immune boosting nutrients, Primula Veris (Cowslip) acts to heal skin affected by acne and rashes. Over a period of time, skin starts to rejuvenate and the complexion becomes more radiant and healthier.

Leontopodium Alpinum Flower/Leaf Extract: This plant extract contains lignans, one of the constituents that have a natural skin-calming benefit. Edelweiss also contains a

General Manager
Pei Angela Willimann

Seite: 2

viocap

compound known as leontopodic acid, which research has shown strengthens skin's barrier and helps reduce signs of sensitivity.

Achillea Millefolium Extract: is Commonly known as yarrow extract. It's antioxidant properties can rejuvenate skin's surface and has calming abilities. The oil form can help fade dark spots but may also irritate skin. Ruled safe as used in cosmetics.

Melissa Officinalis Leaf Extract: It is used in perfumery and as a soothing fragrance in toiletries as well. It also has antifungal and antimicrobial effects on the skin and hair. So, it may be useful in case of skin affected with acne as it may calm the skin at the same time it may kill the harmful acne-causing bacteria.

Veronica Officinalis Extract: It can inhibit skin cells from producing excess melanin pigments by inhibiting the tyrosinase activity, which in turn, reduces melanin biosynthesis. This promotes skin lightening activity, reduces age spots colour intensity and even up the skin tone.

Citrus Paradisi Peel Oil, Pelargonium Graveolens Oil, Cananga Odorata Flower Oil: Mixture of organic essential oils, main topic is the nice fragrance.

Mentha Piperita Leaf Extract: Peppermint essential oil is used to soothe inflammation, irritation and itchiness on skin and scalp. It promotes wound-healing, and it is also touted as a natural remedy for soothing bug bites, and providing relief in pruritus, a common skin infection which leads to rashes, hives and itchiness.

Xanthan Gum: 100% natural viscosity regulator

Lactic Acid: pH regulation. Lactic acid is an acidifier with moisturizing, exfoliation and antibacterial properties. This natural L-lactic acid is produced from sugar by fermentation.

72k extra-comfort cleansing foam

Ingredients (INCI):

Aqua, Pentylene Glycol, Glycerin, Sodium Coco-Sulfate, Alcohol*, Sucrose Cocoate, Artemisia Annu Extract*, Artemisia Vulgaris Extract*, Simmondsia Chinensis Seed Oil*, Leontopodium Alpinum Flower/Leaf Extract*, Magnolia Biondii Flower Extract*,* Coco-Glucoside, Disodium Cocoyl Glutamate, Sodium Cocoyl Glutamate, Tocopherol, Helianthus Annuus Seed Oil, Citrus Paradisi Peel Oil*, Pelargonium Graveolens Oil*, Cananga Odorata Flower Oil*, Xanthan Gum, Potassium Sorbate, Lactic Acid

* certified organic

Explanation to the ingredients:

Aqua: We exclusively use water from the 'Adelboden' mineral springs. It's one of the highest springs in Europe, in the heart of the Swiss Alps. Our mineral water springs up far away from any environmental influences after a journey of several years through the rock layers of the untouched mountain world of the Swiss-Alps.

Pentylene Glycol: Pentylene Glycol is the ideal multifunctional ingredient that boosts the performance of active ingredients, moisturizes the skin, improves the sensorial profile of formulas and enhances product protection. Pentylene glycol natural is a polyvalent alcohol and has to bind therefore the quality water. This quality can be used to supply humidity to the skin. The skin is better soaked, looks clearly beaming and feels better.

Glycerin: Our Glycerine is plant derived and of organic quality. Glycerine is a humectant for creams and lotions. It conveys a pleasant, soft skin feeling. We use Glycerine also as an extraction agent in our Artemisia Annu Extract.

Sodium Coco-Sulfate: is an anionic surfactant derived from 100% natural vegetable oil. It provides excellent cleaning, foaming, thickening and conditioning properties.

Alcohol: We use exclusively plant derived organic alcohol. We use alcohol as an extraction agent in the Artemisia Annu Extrakt.

Sucrose Cocoate: It is a very mild, non-ionic, natural co-surfactant with approx. 65 % washing-active substance that provides a pleasant re-fatting effect. It improves the mucous membrane compatibility of other surfactants. Sucrose Cocoate is a blend of sucrose esters with fatty acid esters from coconut oil and.

Artemisia Annu Extract: see webpage 72k.com

Artemisia Vulgaris Extract: is rich in antioxidants, which can help to protect the skin from damage caused by free radicals. Additionally, mugwort contains a compound called artemisinin, which has been shown to have antibacterial and anti-inflammatory properties. Sometimes the combination of Artemisia Annu and Artemisia Vulgaris is synergistic and of great use.

Simmondsia Chinensis Seed Oil: organic jojoba oil from Peru. The golden yellow jojoba oil is actually a low melting wax known for its moisturising and nourishing properties. It is particularly effective for oily and irritated skin. The mixture of provitamin A, B vitamins and natural vitamin E makes jojoba oil an effective antioxidant that has a stabilizing effect on the skin's protective barrier and protects against environmental influences. The high proportion of eicosanoid acid of over 70% ensures well-cared for skin and gives it noticeably more elasticity and resilience.

Leontopodium Alpinum Flower/Leaf Extract: This plant extract contains lignans, one of the constituents that have a natural skin-calming benefit. Edelweiss also contains a compound known as leontopodic acid, which research has shown strengthens skin's barrier and helps reduce signs of sensitivity.

Magnolia Biondii Flower Extract: Magnolia extract has various beneficial properties in cosmetics. It has a strong anti-inflammatory effect and is very well tolerated by the skin. It promotes lipid synthesis and soothes and reduces redness – the ideal 'anti-stress program' for sensitive skin.

Coco-Glucoside: An all-round surfactant with proven mildness. Coco Glucoside is a non-ionic surfactant made from 100% renewable, plant-based raw materials and is RSPO-MB certified. It has a premium environmental and skin compatibility profile and creates a perfect synergy of mildness, foaming performance and effective cleansing. Coco Glucoside is very gentle on skin. It improves the skin compatibility of conventional surfactant systems and convinces with excellent foaming behaviour, also in combination with other surfactants. It is particularly suitable for sensitive skin.

Disodium / Sodium Cocoyl Glutamate: This is an extremely mild amino acid-based surfactant, well suited for sensitive skin. Disodium/Sodium Cocoyl Glutamate MB is a multifunctional anionic surfactant with very good cleaning performance. It reduces the absorption of anionic surfactants and thus prevents the skin from drying out, which is why it is excellently suited for sensitive and allergic skin and has an extremely low irritation potential. The surfactant has a fine foam, excellent foaming properties and high foam stability. Furthermore, it has good emulsifying properties, is very environmentally friendly and biodegradable.

VIOCAP 72k Product Line

INCI's

Date: 04.12.2023

72k active toner spray women

Ingredients (INCI):

Aqua, Alcohol*, Glycerin, Artemisia Annua Extract*, Artemisia Abrotanum Extract*, Artemisia Vulgaris Extract*, Leontopodium Alpinum Flower/Leaf Extract*, Rosa Damascena Flower Water*, Centaurea Cyanus Flower Extract*, Pentylene Glycol, Pelargonium Graveolens Oil*, Citrus Paradisi Peel Oil*, Cananga Odorata Flower Oil*, Coco-Glucoside, Lactic Acid, Citronellol**, Limonene**

* certified organic, ** part of natural essential oils

Explanation to the ingredients:

Aqua: We exclusively use water from the 'Adelboden' mineral springs. It's one of the highest springs in Europe, in the heart of the Swiss Alps. Our mineral water springs up far away from any environmental influences after a journey of several years through the rock layers of the untouched mountain world of the Swiss-Alps.

Alcohol: We use exclusively plant derived organic alcohol. We use alcohol as an extraction agent in the Artemisia Annua Extract.

Special use of alcohol in tonic and serum applications:

The name tonic comes from the term 'toning' and means increasing the tension of muscles, nerves and blood vessels. And that is exactly what we achieve with the 72k Tonic.

Alcohol opens up cell connections and penetrates the skin barrier. This improves the skin's absorption capacity. This makes it easier for subsequent ingredients from creams and serums to penetrate the skin and develop their full effect.

The positive property of alcohol is always used in combination with soothing and nourishing active ingredients, especially in toners. After toning, less subsequent care is required due to the improved absorption capacity.

Glycerin: Our Glycerine is plant derived and of organic quality. Glycerine is a humectant for creams and lotions. It conveys a pleasant, soft skin feeling. We use Glycerine also as an extraction agent in our Artemisia Annua Extract.

the deepest layer of the skin, adipocytes treated with an aqueous extract of southernwood accumulate more triglycerides than their placebo treated counterparts. The combination of Artemisia Annua and Artemisia Abrotanum is synergistic and of great use.

Artemisia Vulgaris Extract: is rich in antioxidants, which can help to protect the skin from damage caused by free radicals. Additionally, mugwort contains a compound called artemisinin, which has been shown to have antibacterial and anti-inflammatory properties. Sometimes the combination of Artemisia Annua and Artemisia Vulgaris is synergistic and of great use.

Leontopodium Alpinum Flower/Leaf Extract: This plant extract contains lignans, one of the constituents that have a natural skin-calming benefit. Edelweiss also contains a compound known as leontopodic acid, which research has shown strengthens skin's barrier and helps reduce signs of sensitivity.

Rosa Damascena Flower Water: Rosa Damascena is a staple ingredient in many natural rose water products; it has antibacterial, antimicrobial, and anti-inflammatory properties, thus helping soothe skin, minimize pores, and reduce fine lines.

Centaurea Cyanus Flower Extract: Due to centaurea cynaus flower water containing astringent properties makes it the optimal ingredient to combat any active spots and removing any bacteria or impurities as well as regulating the production of sebum on the skin meaning it is a beneficial for blemish-prone and oily skin types.

Pentylene Glycol: Pentylene Glycol is the ideal multifunctional ingredient that boosts the performance of active ingredients, moisturizes the skin, improves the sensorial profile of formulas and enhances product protection. Pentylene glycol natural is a polyvalent alcohol and has to bind therefore the quality water. This quality can be used to supply humidity to the skin. The skin is better soaked, looks clearly beaming and feels better.

Coco-Glucoside: An all-round surfactant with proven mildness. Coco Glucoside is a non-ionic surfactant made from 100% renewable, plant-based raw materials and is RSPO-MB certified. It has a premium environmental and skin compatibility profile and creates a perfect synergy of mildness, foaming performance and effective cleansing. Coco Glucoside is very gentle on skin. It improves the skin compatibility of conventional surfactant systems and convinces with excellent foaming behaviour, also in combination with other surfactants. It is particularly suitable for sensitive skin.

Tonic application: surface tension breaking for smooth spraying.

Citrus Paradisi Peel Oil, Pelargonium Graveolens Oil, Cananga Odorata Flower Oil: Mixture of organic essential oils, main topic is the nice fragrance.

Lactic Acid: pH regulation. Lactic acid is an acidifier with moisturising, exfoliation and antibacterial properties. This natural L-lactic acid is produced from sugar by fermentation.

alcohol and has to bind therefore the quality water. This quality can be used to supply humidity to the skin. The skin is better soaked, looks clearly beaming and feels better.

Propanediol: It is the solvent of the Acmella Oleracea Extract. It provides adequate hydration, moisturization, deep cleansing, and minimal skin irritation or sensitization, similar function like Pentylene Glycol.

Artemisia Annu Extract: see webpage 72k.com

Sodium Hyaluronate: Sodium hyaluronate is usually used for anti-aging and moisturizing because of its ability to improve firmness levels, smooth out fine lines, and hydrate the skin. You can find sodium hyaluronate in many products, including serums and moisturizers. It is also possible to take it as an oral supplement. We use low- and ultra-low-molecular weight hyaluronic acid.

Acmella Oleracea Extract: it has been clinically tested to target the loss of skin firmness and appearance of deep wrinkles by stimulating the fibroblast biomechanical functions. The benefits are fine lines and wrinkles caused by muscle tension will be reduced, and leads to a smoother and firmer skin.

Artemisia Vulgaris Extract: is rich in antioxidants, which can help to protect the skin from damage caused by free radicals. Additionally, mugwort contains a compound called artemisinin, which has been shown to have antibacterial and anti-inflammatory properties. Sometimes the combination of Artemisia Annu and Artemisia Vulgaris is synergistic and of great use.

Cetraria Islandica Extract: It's a so-called demulcent, an agent that forms a soothing and moisturizing film over the face and relieves dryness and irritation.

Bambusa Vulgaris Leaf Extract: Limiting skin aging by neutralizing free radicals. The antioxidant activity of bamboo extract is due to the presence of flavones that fight against oxidative stress. Furthermore it absorbs sebum to mattify oily skin and alleviate irritations and redness's.

Leontopodium Alpinum Flower/Leaf Extract: This plant extract contains lignans, one of the constituents that have a natural skin-calming benefit. Edelweiss also contains a compound known as leontopodic acid, which research has shown strengthens skin's barrier and helps reduce signs of sensitivity.

Caffeine: Thanks to its stimulating and activating properties and its natural occurrence, caffeine is ideal for use in natural cosmetics. Caffeine is an absolute multi-talent when it comes to cosmetics. It supplies the cells particularly well with oxygen and nutrients, which thus get enough energy. Depending on the composition/area of application, this active ingredient convinces in a variety of ways. It can positively influence the microcirculation and acts as a natural stimulant for skin and hair. It promotes blood circulation, reduces swelling more quickly and stimulates hair growth. Even unpleasant skin dents caused by cellulite can be significantly reduced.

In addition, caffeine also transports other active ingredients, for example against skin aging and wrinkles, more quickly through the cell layers of the skin. Caffeine unfolds its full effect, for example, when treating a swollen eye area. In the case of thick eyelids and dark rings around the eyes, caffeine's dehydrating effect helps to remove the accumulated fluid and smooth the skin.

Glyceryl Glucoside: is a multifunctional anti-aging active ingredient for mature or tired and stressed skin with strong cell-stimulating properties. The energy booster focuses especially on tired, stressed or mature skin. Glyceryl Glucoside vitalizes, stimulates and improves slowed down and impaired cell functions, resulting in powerful and youthful looking skin. At the same time, the natural stress protection molecule provides immediate and noticeable moisture - all day long.

Glyceryl Glucoside is found in special desert plants, so-called resurrection plants (e.g. *Myrothamnus flabellifolia*). There, the stress protection molecule acts as protection for the plant during the long dry periods that the plant so effortlessly survives without a drop of rain. As soon as the plant has some water available again, Glyceryl Glucoside revitalizes and stimulates the plant structures. Shrubs that have completely dried out come back to life within a few hours and shine in a lush green.

Citrus Paradisi Peel Oil: Mixture of organic essential oils, main topic is the nice fragrance.

Xanthan Gum: 100% natural viscosity regulator

Lactic Acid: pH regulation. Lactic acid is an acidifier with moisturising, exfoliation and antibacterial properties. This natural L-lactic acid is produced from sugar by fermentation.

VIOCAP 72k Product Line

INCI's

Date: 04.12.2023

72k face cream women

Ingredients (INCI):

Aqua, Argania Spinosa Kernel Oil*, Simmondsia Chinensis Seed Oil*, Macadamia Ternifolia Seed Oil*, Pentylene Glycol, Glycerin, Alcohol*, Propanediol, Hylocereus Undatus Fruit Extract, Adansonia Digitata Seed Oil*, Glyceryl Stearate Se, Cetyl Alcohol, Artemisia Annu Extract*, Butyrospermum Parkii Butter*, Glyceryl Stearate Citrate, Artemisia Vulgaris Extract*, Artemisia Abrotanum Extract*, Sodium Hyaluronate, Acmella Oleracea Extract, Rosa Rubiginosa Seed Oil*, Tocopherol, Leontopodium Alpinum Flower/Leaf Extract*, Polyglyceryl-3 Distearate, Pelargonium Graveolens Oil*, Citrus Paradisi Peel Oil*, Cananga Odorata Flower Oil*, Helianthus Annuus Seed Oil, Xanthan Gum, Lactic Acid, Potassium Sorbate, Citronellol**, Geraniol**, Benzyl Benzoate**, Linalool**, Limonene**

* certified organic, ** part of natural essential oils

Explanation to the ingredients:

Aqua: We exclusively use water from the 'Adelboden' mineral springs. It's one of the highest springs in Europe, in the heart of the Swiss Alps. Our mineral water springs up far away from any environmental influences after a journey of several years through the rock layers of the untouched mountain world of the Swiss-Alps.

Argania Spinosa Kernel Oil: is ideal for the care of mature and dry skin, acne, eczema, and psoriasis. The cold pressed argan oil in organic quality is golden yellow and smells slightly nutty. It has a balanced composition of oleic acid, linoleic acid and palmitic acid and is ideal for dry, mature and also damaged skin and is used in numerous care and cleansing products. In anti-aging preparations it has a regenerating and protective effect.

Simmondsia Chinensis Seed Oil: organic jojoba oil from Peru. The golden yellow jojoba oil is actually a low melting wax known for its moisturising and nourishing properties. It is particularly effective for oily and irritated skin. The mixture of provitamin A, B vitamins and natural vitamin E makes jojoba oil an effective antioxidant that has a stabilizing effect on the skin's protective barrier and protects against environmental influences. The high proportion of eicosanoid acid of over 70% ensures well-cared for skin and gives it noticeably more elasticity and resilience.

Macadamia Ternifolia Seed Oil: Macadamia nut oil strengthens the skin barrier and is considered very well tolerated. In terms of composition, it resembles human sebum and thus supports the effect of biomimetic cosmetics. The high percentage of palmitoleic acid

viocap

makes this oil skin-friendly. It absorbs well, has a regenerating, cell renewal and skin tightening effect. Macadamia nut oil has a yellowish color and smells delicately nutty. The fatty acid spectrum is characterized by the rare palmitoleic acid in addition to the oleic acid. This combination ensures that the nourishing macadamia nut oil can be easily distributed without leaving a greasy film on the skin. It also strengthens the skin barrier and is considered very well tolerated. Macadamia nut oil is particularly suitable for the care of sensitive, irritated and dry skin. Rough and chapped hands become soft and supple again with hand creams or hand masks containing macadamia nut oil. In body care, macadamia nut oil can be used to prevent stretch marks or for scar care.

Pentylene Glycol: Pentylene Glycol is the ideal multifunctional ingredient that boosts the performance of active ingredients, moisturizes the skin, improves the sensorial profile of formulas and enhances product protection. Pentylene glycol natural is a polyvalent alcohol and has to bind therefore the quality water. This quality can be used to supply humidity to the skin. The skin is better soaked, looks clearly beaming and feels better.

Glycerin: Our Glycerin is plant derived and of organic quality. Glycerin is a humectant for creams and lotions. It conveys a pleasant, soft skin feeling. We use Glycerin also as an extraction agent in our Artemisia Annu Extract.

Alcohol: We use exclusively plant derived organic alcohol. We use alcohol as an extraction agent in the Artemisia Annu Extract.

Propanediol: It is the solvent of the Acmella Oleracea Extract. It provides adequate hydration, moisturization, deep cleansing, and minimal skin irritation or sensitization, similar function like Pentylene Glycol.

Hylocereus Undatus Fruit Extract: Antioxidant-rich plant-extract derived from the Hylocereus undatus fruit, AKA pitaya or white dragon fruit. It assists in protecting skin from pro-aging environmental stressors and helps skin maintain a youthful glow.

Adansonia Digitata Seed Oil: It's rich in nourishing fatty acids oleic (30-40%), linoleic (24-34%) and palmitic (18-30%). Its moisturizing benefits are impressive, it absorbed into the skin quickly and might even improve skin elasticity. A great oil for drier skin types and excellent for eczema and psoriasis.

Glyceryl Stearate Se: is a versatile O/W emulsifier based on vegetable raw materials. This anionic emulsifier can be used in a wide range of products. It creates light, smooth emulsions that produce a distinctly moist skin feel. Creams and lotions with Glyceryl Stearate SE are absorbed very well and leave no greasy shine.

Cetyl Alcohol: can bind water very well and supports emulsion formation. Because of this property, it is often used as a consistency enhancer and co-emulsifier. Cetyl alcohol makes emulsions firmer, but can still be applied very well on the skin.

Artemisia Annu Extract: see webpage 72k.com

Butyrospermum Parkii Butter: Sheabutter is extracted from the fruits of the Karité tree. It regulates the moisture content of the skin and has a refatting, calming and smoothing effect. Shea butter is a high-quality, excellently tolerated, versatile raw material. Due to the proportion of unsaponifiables, the lipid barrier is strengthened and this butter is therefore predestined for the treatment of dry, neurodermic and barrier-disturbed skin. It is very well tolerated and can also be used pure. In formulations, it provides consistency and results in smooth creams that are very well absorbed.

Glyceryl Stearate Citrate and Polyglyceryl-3 Distearate: This mixture belongs to the group of so-called lipid emulsifiers. Since lipid emulsifiers are optimized for the formation of lamellar structures in O/W emulsions, they have a lower HLB value. The result are wonderful fine creams and lotions.

Artemisia Vulgaris Extract: is rich in antioxidants, which can help to protect the skin from damage caused by free radicals. Additionally, mugwort contains a compound called artemisinin, which has been shown to have antibacterial and anti-inflammatory properties. Sometimes the combination of Artemisia Annua and Artemisia Vulgaris is synergistic and of great use.

Artemisia Abrotanum Extract: In the dermis, the extract works by strengthening the collagen and elastin network through the prevention of proteases. Finally, representing the deepest layer of the skin, adipocytes treated with an aqueous extract of southernwood accumulate more triglycerides than their placebo treated counterparts. The combination of Artemisia Annua and Artemisia Abrotanum is synergistic and of great use.

Sodium Hyaluronate: Sodium hyaluronate is usually used for anti-aging and moisturizing because of its ability to improve firmness levels, smooth out fine lines, and hydrate the skin. You can find sodium hyaluronate in many products, including serums and moisturizers. It is also possible to take it as an oral supplement. We use low- and ultra-low-molecular weight hyaluronic acid.

Acmella Oleracea Extract: it has been clinically tested to target the loss of skin firmness and appearance of deep wrinkles by stimulating the fibroblast biomechanical functions. The benefits are fine lines and wrinkles caused by muscle tension will be reduced, and leads to a smoother and firmer skin.

Rosa Rubiginosa Seed Oil: helps to protect and hydrate skin, fight free radical damage, and reduce wrinkles. The vitamins and antioxidants rejuvenate the skin to restore elasticity, help to correct dark spots, and reduce the appearance of scars.

Tocopherol: is used as an antioxidant for fats and oils for the purpose of stabilization for cosmetic applications.

Leontopodium Alpinum Flower/Leaf Extract: This plant extract contains lignans, one of the constituents that have a natural skin-calming benefit. Edelweiss also contains a compound known as leontopodic acid, which research has shown strengthens skin's barrier and helps reduce signs of sensitivity.

Citrus Paradisi Peel Oil, Pelargonium Graveolens Oil, Cananga Odorata Flower Oil: Mixture of organic essential oils, main topic is the nice fragrance.

Helianthus Annuus Seed Oil: sunflower seed oil – mainly used as the carrier oil for the Tocopherol

Potassium Sorbate: Potassium sorbate is a nature-identical preservative. It is ideal for use in face and body care.

Xanthan Gum: 100% natural viscosity regulator

Lactic Acid: pH regulation. Lactic acid is an acidifier with moisturising, exfoliation and antibacterial properties. This natural L-lactic acid is produced from sugar by fermentation.

VIOCAP 72k Product Line

INCI's - Documentation

Date: 04.12.2023

72k eye serum women

Ingredients (INCI):

Aqua, Alcohol*, Glycerin, Pentylene Glycol, Propanediol, Artemisia Annua Extract*, Sodium Hyaluronate, Acemella Oleracea Extract, Artemisia Abrotanum Extract*, Artemisia Vulgaris Extract*, Argania Spinosa Kernel Oil*, Simmondsia Chinensis Seed Oil*, Euphrasia Officinalis Extract*, Leontopodium Alpinum Flower/Leaf Extract*, Bambusa Vulgaris Leaf Extract*, Tocopherol, Lecithin, Xanthan Gum, Pelargonium Graveolens Oil*, Cananga Odorata Flower Oil*, Citrus Paradisi Peel Oil*, Lactic Acid, Sodium Hydroxide, Limonene**

* certified organic, ** part of natural essential oils

Explanation to the ingredients:

Aqua: We exclusively use water from the 'Adelboden' mineral springs. It's one of the highest springs in Europe, in the heart of the Swiss Alps. Our mineral water springs up far away from any environmental influences after a journey of several years through the rock layers of the untouched mountain world of the Swiss-Alps.

Alcohol: We use exclusively plant derived organic alcohol. We use alcohol as an extraction agent in the Artemisia Annua Extrakt.

Special use of alcohol in tonic and serum applications:

The name tonic comes from the term 'toning' and means increasing the tension of muscles, nerves and blood vessels. And that is exactly what we achieve with the 72k Tonic.

Alcohol opens up cell connections and penetrates the skin barrier. This improves the skin's absorption capacity. This makes it easier for subsequent ingredients from creams and serums to penetrate the skin and develop their full effect. The positive property of alcohol is always used in combination with soothing and nourishing active ingredients, especially in toners. After toning, less subsequent care is required due to the improved absorption capacity.

Glycerin: Our Glycerine is plant derived and of organic quality. Glycerine is a humectant for creams and lotions. It conveys a pleasant, soft skin feeling. We use Glycerine also as an extraction agent in our Artemisia Annua Extract.

Pentylene Glycol: Pentylene Glycol is the ideal multifunctional ingredient that boosts the performance of active ingredients, moisturizes the skin, improves the sensorial profile

Euphrasia Officinalis Extract: It counteracts inflammation and reduces mucous drainage, thanks to its high levels of iridoid glycosides, flavonoids, and tannins. Eyebright was and continues to be used primarily as a poultice for the topical treatment of eye inflammations, including blepharitis, conjunctivitis, and styes.

Leontopodium Alpinum Flower/Leaf Extract: This plant extract contains lignans, one of the constituents that have a natural skin-calming benefit. Edelweiss also contains a compound known as leontopodic acid, which research has shown strengthens skin's barrier and helps reduce signs of sensitivity.

Bambusa Vulgaris Leaf Extract: Limiting skin aging by neutralizing free radicals. The antioxidant activity of bamboo extract is due to the presence of flavones that fight against oxidative stress. Furthermore it absorbs sebum to mattify oily skin and alleviate irritations and redness's.

Tocopherol: is used as an antioxidant for fats and oils for the purpose of stabilization for cosmetic applications.

Lecithin: This natural emulgator is additionally acting as a hydration agent. Lecithin prevents water loss to the epidermal and dermal cells, plumping the cells and restoring an even skin tone with fewer flakes, fine lines, and wrinkles.

Xanthan Gum: 100% natural viscosity regulator

Citrus Paradisi Peel Oil, Pelargonium Graveolens Oil, Cananga Odorata Flower Oil: Mixture of organic essential oils, main topic is the nice fragrance.

Lactic Acid: pH regulation. Lactic acid is an acidifier with moisturising, exfoliation and antibacterial properties. This natural L-lactic acid is produced from sugar by fermentation.

Prunus Armeniaca Kernel Oil: Apricot Kernel Oil skin benefits are many; an antioxidant-rich oil, its application aids in the protection from free radicals. Apricot Oil for skin contains a high content of Vitamin A which helps stimulate cell turnover, plumping the skin and reducing the appearance of fine lines and wrinkles.

Propanediol: It is the solvent of the Acmella Oleracea Extract. It provides adequate hydration, moisturization, deep cleansing, and minimal skin irritation or sensitization, similar function like Pentylene Glycol.

Adansonia Digitata Seed Oil: It's rich in nourishing fatty acids oleic (30-40%), linoleic (24-34%) and palmitic (18-30%). Its moisturizing benefits are impressive, it absorbed into the skin quickly and might even improve skin elasticity. A great oil for drier skin types and excellent for eczema and psoriasis.

Cetyl Alcohol: can bind water very well and supports emulsion formation. Because of this property, it is often used as a consistency enhancer and co-emulsifier. Cetyl alcohol makes emulsions firmer, but can still be applied very well on the skin.

Artemisia Annua Extract: see webpage 72k.com

Butyrospermum Parkii Butter: Sheabutter is extracted from the fruits of the Karité tree. It regulates the moisture content of the skin and has a refatting, calming and smoothing effect. Shea butter is a high-quality, excellently tolerated, versatile raw material. Due to the proportion of unsaponifiables, the lipid barrier is strengthened and this butter is therefore predestined for the treatment of dry, neurodermic and barrier-disturbed skin. It is very well tolerated and can also be used pure. In formulations, it provides consistency and results in smooth creams that are very well absorbed.

Glyceryl Stearate Citrate and Polyglyceryl-3 Distearate: This mixture belongs to the group of so-called lipid emulsifiers. Since lipid emulsifiers are optimized for the formation of lamellar structures in O/W emulsions, they have a lower HLB value. The result are wonderful fine creams and lotions.

Artemisia Vulgaris Extract: is rich in antioxidants, which can help to protect the skin from damage caused by free radicals. Additionally, mugwort contains a compound called artemisinin, which has been shown to have antibacterial and anti-inflammatory properties. Sometimes the combination of Artemisia Annua and Artemisia Vulgaris is synergistic and of great use.

Acmella Oleracea Extract: it has been clinically tested to target the loss of skin firmness and appearance of deep wrinkles by stimulating the fibroblast biomechanical functions. The benefits are fine lines and wrinkles caused by muscle tension will be reduced, and leads to a smoother and firmer skin.

Sodium Hyaluronate: Sodium hyaluronate is usually used for anti-aging and moisturizing because of its ability to improve firmness levels, smooth out fine lines, and hydrate the skin. You can find sodium hyaluronate in many products, including serums and moisturizers. It is also possible to take it as an oral supplement. We use low- and ultra-low-molecular weight hyaluronic acid.

Leontopodium Alpinum Flower/Leaf Extract: This plant extract contains lignans, one of the constituents that have a natural skin-calming benefit. Edelweiss also contains a compound known as leontopodic acid, which research has shown strengthens skin's barrier and helps reduce signs of sensitivity.

Tocopherol: is used as an antioxidant for fats and oils for the purpose of stabilization for cosmetic applications.

Cucurbita Pepo Seed Oil: Rich in antioxidants (including vitamin E and C, omega 3 and 6, carotenoids, and zinc), Pumpkin Seed Oil contains anti-inflammatory properties and supports wound healing, production of collagen, oil balance, and reduction of free radicals.

Pelargonium Graveolens Oil: organic essential oils, main topic is the nice fragrance.

Euphrasia Officinalis Extract: It counteracts inflammation and reduces mucous drainage, thanks to its high levels of iridoid glycosides, flavonoids, and tannins. Eyebright was and continues to be used primarily as a poultice for the topical treatment of eye inflammations, including blepharitis, conjunctivitis, and styes.

Helianthus Annuus Seed Oil: sunflower seed oil – mainly used as the carrier oil for the Tocopherol

Potassium Sorbate: Potassium sorbate is a nature-identical preservative. It is ideal for use in face and body care.

Xanthan Gum: 100% natural viscosity regulator

Lactic Acid: pH regulation. Lactic acid is an acidifier with moisturising, exfoliation and antibacterial properties. This natural L-lactic acid is produced from sugar by fermentation.

VIOCAP 72k Product Line

INCI's

Date: 07.12.2023

72k the Enzyme Peeling (V. 1.06b)

Ingredients (INCI):

Kaolin, Zea Mays Starch*, Sodium Cocoyl Glutamate, Maranta Arundinacea Root Powder*, Sodium Bicarbonate, Distarch Phosphate, Sodium Coco-Sulfate, Citric Acid, Xanthan Gum, Pectin, Beta-Glucan, Artemisia Annu Extract*, Bambusa Arundinacea Stem Extract*, Bromelain, Fragrance (Parfum), Linalool**, Geraniol**

* certified organic, ** part of natural essential oils

Explanation to the ingredients:

Kaolin: Kaolin clay is a type of clay commonly used in the cosmetic and skin care industry. The clay is named for the hill in which it was initially discovered, Kao-ling in China. Kaolin clay is also rich in a mineral known as kaolinite and feldspar, quartz and silica dioxide (among others).

Consistency-wise, kaolin clay tends to be on the finer, softer side. It also has a relatively low pH of 4.5, which puts it on the more basic side of the pH scale. Under normal conditions, the pH of our skin sits at around 5.5. Because kaolin clay's pH is so close to our natural pH, it tends to be more readily accepted and causes less irritation.

Its powers of deep cleansing and exfoliating make kaolin clay a great option for minimizing the look of pores. Absorbs excess oil: Kaolin's absorbent properties help it soak up excess shine without completely stripping your skin of natural oils. This leaves skin looking balanced, glowing and nourished.

Zea Mays Starch: Maize starch is suitable in cosmetics, especially to increase or decrease the viscosity of products. We use organic quality only.

Sodium Cocoyl Glutamate: This is an extremely mild amino acid-based surfactant, well suited for sensitive skin. Sodium Cocoyl Glutamate MB is a multifunctional anionic surfactant with very good cleaning performance. It reduces the absorption of anionic surfactants and thus prevents the skin from drying out, which is why it is excellently suited for sensitive and allergic skin and has an extremely low irritation potential. The surfactant has a fine foam, excellent foaming properties and high foam stability. Furthermore, it has good emulsifying properties, is very environmentally friendly and biodegradable.

Maranta Arundinacea Root Powder: Arrowroot has numerous benefits for the skin.

It soothes rashes, it helps with healing sunburns and with acne.

Arrowroot reduces inflammation is used for exfoliates skin. It is a prebiotic and can lead to improved skin, health and digestion. It contains vitamins and minerals.

This vegetable starch is non-drying, absorbs grease and moisture and has a mattifying effect. It is a good substitute for talcum powder.

Sodium Bicarbonate: pH regulator. Here we use Bicarbonate in combination with citric acid to achieve a nice reaction when mixed together with water. When dissolved, both compounds react together and release carbon dioxide with is immediately causing a stable foam.

Distarch Phosphate: serves as a powder base for exfoliation and keratolytic powder preparations such as face powder. It leaves a silky feeling, reduces skin lipids, mattifies and does not swell.

Sodium Coco-Sulfate: is an anionic surfactant derived from 100% natural vegetable oil. It provides excellent cleaning, foaming, thickening and conditioning properties.

Citric Acid: pH regulation. Citric acid is an acidifier.

Xanthan Gum: 100% natural viscosity regulator

Pectin and Beta-Glucan: are vegetable fibers that simultaneously emulsifies, thickens, are easy to process and are completely natural.

Beta-Glucan can protect the skin's barrier, Beta-Glucans can help prevent cell damage and help to soothe redness and irritation. Beta-Glucans are known for their skin plumping properties and are helping to deeply hydrate the skin, plumping and firming fine lines and wrinkles. Pectin keeps the skin pleasantly moisturized and promotes cell renewal. It acts as an anti-aging product in the care of aging skin.

Artemisia Annu Extract: see webpage 72k.com

Bambusa Arundinacea Stem Extract: Bamboo extract is a great natural moisturiser which soothes and smoothes skin while helping it hydrate. It supports and assists the healing of skin and has antibacterial properties to cleanse, purify and detoxify. Bamboo is also rich in natural silica which help give your skin a radiant glow.

Bambusa Arundinacea Stem Extract is an organic silica extracted from the dried bamboo sap, Bambusa Arundinacea. This powder is very rich in hydrated silica (more than 87%), which promotes cell renewal, refines skin texture, unclogs pores and enhances the penetration and effectiveness of skin care products. With a fine particle size (100 to 250 microns) for facial exfoliation, Bamboo Face Srub enables precise exfoliation that mechanically removes all dead cells and impurities as well as imperfections; sebum is absorbed. The skin is left softer, smoother and more radiant.

Bromelain: Bromelain has anti-inflammatory properties that can help soothe sensitive skin and reduce redness. This makes it an ideal skincare ingredient for those with acne-prone or inflamed skin, as it can help calm irritation and promote healing.

Bromelain is an anti-inflammatory agent that is extracted from stems of pineapples. Bromelain is a natural plant protease that is derived from pineapple strains. The main component is the enzyme bromelain.

It has a strong anti-inflammatory effect and reduces skin tanning caused by the sun. It also acts selectively on aged skin cells, breaks them down and shows a nice peeling effect. So it leads to soft and tender skin. It can also be used to lighten skin and remove freckles.

Fragrance (Parfum): Mixture of organic essential oils, main topic is the nice fragrance.

VIOCAP 72k Product Line

INCI's

Date: 07.12.2023

72k the multi-talent cream mask (new certified organic) (V.1.05)

Ingredients (INCI):

Aqua, Argania Spinosa Kernel Oil*, Caprylic/Capric Triglyceride*, Butyrospermum Parkii Butter*, Squalane, Pentylene Glycol, Cetearyl Glucoside, Glycerin, Theobroma Cacao Seed Butter*, Persea Gratissima Oil*, Rosa Damascena Flower Water*, Cetearyl Alcohol, Hylcoereus Undatus Fruit Extract, Tocopherol, Sodium Hyaluronate, Artemisia Annua Extract*, Ascorbyl Palmitate, Magnolia Officinalis Bark Extract, Aloe Barbadensis Leaf Juice Powder, Vitis Vinifera Seed Oil*, Helianthus Annuus Seed Oil, Fragrance (Parfum), Xanthan Gum, Potassium Sorbate, Lactic Acid

* certified organic

Explanation to the ingredients:

Aqua: We exclusively use water from the 'Adelboden' mineral springs. It's one of the highest springs in Europe, in the heart of the Swiss Alps. Our mineral water springs up far away from any environmental influences after a journey of several years through the rock layers of the untouched mountain world of the Swiss-Alps.

Argania Spinosa Kernel Oil: is ideal for the care of mature and dry skin, acne, eczema, and psoriasis. The cold pressed argan oil in organic quality is golden yellow and smells slightly nutty. It has a balanced composition of oleic acid, linoleic acid and palmitic acid and is ideal for dry, mature and also damaged skin and is used in numerous care and cleansing products. In anti-aging preparations it has a regenerating and protective effect.

Caprylic/Capric Triglyceride: is known as neutral oil. The liquid oil is colorless and odorless and consists of the medium-chain fatty acids caprylic acid and capric acid. The oil is made from coconut fat. It is organic certified and NATRUE conform. Caprylic/Capric Triglyceride is an oxidatively stable and non-irritating oil with good spreading properties. It improves the application behavior of emulsions, is well absorbed and prevents heavy regreasing. It's very suitable for irritated and sensitive skin and is used for skin care products, sun care and decorative cosmetics.

Butyrospermum Parkii Butter: Sheabutter is extracted from the fruits of the Karité tree. It regulates the moisture content of the skin and has a refatting, calming and smoothing effect. Shea butter is a high-quality, excellently tolerated, versatile raw material. Due to the proportion of unsaponifiables, the lipid barrier is strengthened and this butter is therefore predestined for the treatment of dry, neurodermitic and barrier-

viocap

disturbed skin. It is very well tolerated and can also be used pure. In formulations, it provides consistency and results in smooth creams that are very well absorbed.

Squalane: Squalane is a natural hydrocarbon obtained from the unsaponifiable portion of olive oil. It serves as a valuable skin care base. Squalane protects the skin from moisture loss, makes it soft and supple and thus improves the structure of the natural lipid film. Because of its excellent penetration properties, squalane is used, among other things, as a carrier for active ingredients. In cosmetics, vegetable squalane is mainly used as a fast spreading, oxidation-stable and non-irritant lipid in skin emulsions, sun care products, foundations and hair care products.

Pentylene Glycol: Pentylene Glycol is the ideal multifunctional ingredient that boosts the performance of active ingredients, moisturizes the skin, improves the sensorial profile of formulas and enhances product protection. Pentylene glycol natural is a polyvalent alcohol and has to bind therefore the quality water. This quality can be used to supply humidity to the skin. The skin is better soaked, looks clearly beaming and feels better.

Cetearyl Glucoside: is a non-ionic, BDIH and Ecocert-comfort O/W emulsifier based on *Cetearyl alcohol*, i.e. a mixture of Cetyl and Cetearyl alcohol and Cetearyl Glucoside. It is not irritating, non-comedogenic and is self-emulsifying.

Glycerin: Our Glycerin is plant derived and of organic quality. Glycerin is a humectant for creams and lotions. It conveys a pleasant, soft skin feeling. We use Glycerin also as an extraction agent in our Artemisia Annua Extract.

Theobroma Cacao Seed Butter: Cocoa butter, organic is a very solid vegetable butter and is wonderfully suitable as a consistency agent in emulsions. Especially suitable for dry, sensitive and brittle skin. The cocoa tree has the scientific name "Theobroma cacao", which means "food of the gods". It was considered sacred by the Aztecs.

Our organic cocoa butter is made from cocoa beans by mechanical pressing, deodorization and filtration. It is characterized by a high proportion of saturated fatty acids, many vitamins, minerals and antioxidants. A booster for dry and irritated skin. It has a moisturizing effect and melts gently at body temperature.

Perfect for body butters and lotions, creams, anti-ageing products, soaps, bath additives and in lip care products.

Persea Gratissima Oil: This oil is absorbed well into the skin and is absolutely ideal for body care. This oil is of dark green colour and has a fruity smell. Avocado oil is obtained by pressing the pulp of the ripe avocado pear. The fat pressed oil is green to reddish-brown in colour. It contains vitamins A, B, D and E. This supports the cell structure and regeneration of the skin. The natural antioxidants make the oil even more valuable. A special feature of avocado oil is the high content of "unsaponifiables". These substances are considered to be of decisive importance for skin care. Especially for dry, rough and flaky skin, it is an important base oil.

viocap

Rosa Damascena Flower Water: Rosa Damascena is a staple ingredient in many natural rose water products; it has antibacterial, antimicrobial, and anti-inflammatory properties, thus helping soothe the skin, minimize pores, and reduce fine lines.

Cetearyl Alcohol: is a non-ionic, BDIH and Ecocert-comfort O/W emulsifier based on *Cetearyl alcohol*, i.e. a mixture of Cetyl and Cetearyl alcohol and Cetearyl Glucoside. It is not irritating, non-comedogenic and is self-emulsifying.

Hylocereus Undatus Fruit Extract: Antioxidant-rich plant-extract derived from the *Hylocereus undatus* fruit, AKA pitaya or white dragon fruit. It assists in protecting skin from pro-aging environmental stressors and helps skin maintain a youthful glow.

Tocopherol: is used as an antioxidant for fats and oils for the purpose of stabilization for cosmetic applications.

Sodium Hyaluronate: Sodium hyaluronate is usually used for anti-aging and moisturizing because of its ability to improve firmness levels, smooth out fine lines, and hydrate the skin. You can find sodium hyaluronate in many products, including serums and moisturizers. It is also possible to take it as an oral supplement. We use low- and ultra-low-molecular weight hyaluronic acid.

Artemisia Annua Extract: see webpage 72k.com

Ascorbyl Palmitate: This Palmitat is an oil-soluble derivative of ascorbic acid. It increases the stability of ascorbic acid, and it is used as an anti-wrinkle and whitening agent. The vitamin C, which is actually water-soluble, only becomes fat-soluble through esterification with palmitic acid. This makes it much more stable than the water-soluble vitamin-C. In combination with vitamin E, its antioxidant effect is prolonged and fats are better protected against oxidation. Because this vitamin-C palmitate has a regenerating effect on the connective tissue, it is preferred in anti-aging products and also for impure, inflamed skin.

Magnolia Officinalis Bark Extract: Inhibits the growth of bacteria and fungi pH independent. It has an anti-inflammatory effect and is a highly effective anti-aging agent and a powerful antioxidant.

Aloe Barbadensis Leaf Juice Powder: It is ideal for use in healing, moisturizing, anti-inflammatory and anti-aging applications.

Vitis Vinifera Seed Oil: We use this special grape seed oil (made in Switzerland) to make the Artemisia Annua Mazerate. It's of top quality and certified organic. Additionally, it's a light emollient oil that makes your skin feel smooth and nice and also contains a bunch of good-for-the-skin stuff. It's a great source of antioxidant polyphenols, barrier repair fatty acid linoleic acid (about 55-77%, while oleic acid is about 12-27%) and antioxidant, skin-protectant vitamin E.

VIOCAP 72k Product Line

INCI's

Date: 06.12.2023

72k Bakuchiol the face oil (V. 1.08)

Ingredients (INCI):

Argania Spinosa Kernel Oil*, Squalane, Simmondsia Chinensis Seed Oil*, Vitis Vinifera Seed Oil*, Bakuchiol, Tocopherol, Rosa Rubiginosa Seed Oil*, Artemisia Annu Extract*, Ascorbyl Palmitate, Psoralea Corylifolia Seed Extract*, Helianthus Annuus Seed Oil, Fragrance (Parfum), Linalool**

* certified organic, ** part of natural essential oils

Explanation to the ingredients:

Argania Spinosa Kernel Oil: is ideal for the care of mature and dry skin, acne, eczema, and psoriasis. The cold pressed argan oil in organic quality is golden yellow and smells slightly nutty. It has a balanced composition of oleic acid, linoleic acid and palmitic acid and is ideal for dry, mature and also damaged skin and is used in numerous care and cleansing products. In anti-aging preparations it has a regenerating and protective effect.

Squalane: Squalane is a natural hydrocarbon obtained from the unsaponifiable portion of olive oil. It serves as a valuable skin care base. Squalane protects the skin from moisture loss, makes it soft and supple and thus improves the structure of the natural lipid film. Because of its excellent penetration properties, squalane is used, among other things, as a carrier for active ingredients. In cosmetics, vegetable squalane is mainly used as a fast spreading, oxidation-stable and non-irritant lipid in skin emulsions, sun care products, foundations and hair care products.

Simmondsia Chinensis Seed Oil: organic jojoba oil from Peru. The golden yellow jojoba oil is actually a low melting wax known for its moisturising and nourishing properties. It is particularly effective for oily and irritated skin. The mixture of provitamin A, B vitamins and natural vitamin E makes jojoba oil an effective antioxidant that has a stabilizing effect on the skin's protective barrier and protects against environmental influences. The high proportion of eicosanoid acid of over 70% ensures well-cared for skin and gives it noticeably more elasticity and resilience.

Vitis Vinifera Seed Oil: We use this special grape seed oil (made in Switzerland) to make the Artemisia Annu Mazerate. It's of top quality and certified organic. Additionally, it's a light emollient oil that makes your skin feel smooth and nice and also contains a bunch of good-for-the-skin stuff. It's a great source of antioxidant polyphenols, barrier repair fatty acid linoleic acid (about 55-77%, while oleic acid is about 12-27%) and antioxidant, skin-protectant vitamin E.

Bakuchiol: Bakuchiol works effectively like retinol against skin aging and acne. However, without the disadvantages of retinol, such as skin irritation or photochemical instability. Bakuchiol is THE new trend active ingredient for our skin. Why? Because it is effective against skin aging and acne like retinol, but without the disadvantages of retinol, such as skin irritation or photochemical instability.

Bakuchiol is 100% natural and is extracted from the Babchi seeds. Against skin aging, bakuchiol has a stimulating effect on collagen production, reduces wrinkles and hyperpigmentation and can increase skin elasticity and strength. In acne, it prevents the prooxidation of skin lipids by keeping the protective mantle active. It controls the overproduction of bacteria on the skin, inhibits pro-inflammatory genes and enzymes, and reduces keratinization of the skin. In addition, it does not make the skin sensitive to light, so it can also be used safely in the morning. Nevertheless, you should not do without sun protection. Bakuchiol is suitable for all skin types: whether dry, sensitive, oily or combination skin.

(Only in exceptional cases such as rosacea or eczema should bakuchiol be used with caution. A small dosage is especially important in this case, otherwise it may cause skin spots. In general you never do anything wrong by starting with a small dosage and then gradually using more of the bakuchiol cream or oil.)

Tocopherol: is used as an antioxidant for fats and oils for the purpose of stabilization for cosmetic applications.

Rosa Rubiginosa Seed Oil: helps to protect and hydrate skin, fight free radical damage, and reduce wrinkles. The vitamins and antioxidants rejuvenate the skin to restore elasticity, help to correct dark spots, and reduce the appearance of scars.

Artemisia Annu Extract: here we use dried organic Artemisia Annu plant and make a wonderful mazerate with organic grape seed oil.

Ascorbyl Palmitate: This Palmitat is an oil-soluble derivative of ascorbic acid. It increases the stability of ascorbic acid, and it is used as an anti-wrinkle and whitening agent. The vitamin C, which is actually water-soluble, only becomes fat-soluble through esterification with palmitic acid. This makes it much more stable than the water-soluble vitamin-C. In combination with vitamin E, its antioxidant effect is prolonged and fats are better protected against oxidation. Because this vitamin-C palmitate has a regenerating effect on the connective tissue, it is preferred in anti-aging products and also for impure, inflamed skin.

VIOCAP 72k Product Line INCI's

Date: 06.12.2023

72k sun SPF 30 tinted

Ingredients (INCI):

Aqua, Caprylic/Capric Triglyceride*, Titanium Dioxide, Zinc Oxide, Polyhydroxystearic Acid, Glycerin, Isoamyl Laurate, Pentylene Glycol, Prunus Armeniaca Kernel Oil*, Stearic Acid, Cetearyl Glucoside, Sodium Hyaluronate, Artemisia Annuua Extract*, Butyrospermum Parkii Butter*, Tocopherol, Helianthus Annuus Seed Oil, Glyceryl Stearate Se, Glyceryl Stearate Citrate, Cetearyl Alcohol, Cetyl Alcohol, Alumina, Fragrance (Parfum), Xanthan Gum, Lactic Acid, Potassium Sorbate, Alcohol, [+/- CI 77491, CI 77492, CI 77499]

* certified organic

Explanation to the ingredients:

Aqua: We exclusively use water from the 'Adelboden' mineral springs. It's one of the highest springs in Europe, in the heart of the Swiss Alps. Our mineral water springs up far away from any environmental influences after a journey of several years through the rock layers of the untouched mountain world of the Swiss-Alps.

Caprylic/Capric Triglyceride: is known as neutral oil. The liquid oil is colorless and odorless and consists of the medium-chain fatty acids caprylic acid and capric acid. The oil is made from coconut fat. It is organic certified and NATRUE conform. Caprylic/Capric Triglyceride is an oxidatively stable and non-irritating oil with good spreading properties. It improves the application behavior of emulsions, is well absorbed and prevents heavy greasing. It's very suitable for irritated and sensitive skin and is used for skin care products, sun care and decorative cosmetics.

Titanium Dioxide: Titanium dioxide is an inert earth mineral used as a thickening, opacifying, and sunscreen ingredient in cosmetics. It protects skin from UVA and UVB radiation and is considered non-risky in terms of skin sensitivity.

Zinc Oxide: Zinc oxide is an active ingredient found in sunscreens, used to treat itching, skin infections, chapped skin, and skin conditions. Besides, it has great wound healing capabilities too.

Polyhydroxystearic Acid: It maintains and reinforces the lipid barrier. It also retains moisture in the skin and makes it appear more soft, smooth, and healthy. It is also used

viocap

in sunscreens to coat the oxide particles. It also helps in the proper dispersion of sunscreen when applied on the skin and increases its effectiveness.

Glycerin: Our Glycerin is plant derived and of organic quality. Glycerin is a humectant for creams and lotions. It conveys a pleasant, soft skin feeling. We use Glycerin also as an extraction agent in our Artemisia Annuua Extract.

Isoamyl Laurate: is a highly spreadable, light emollient for natural formulations with a light, non-sticky skin feel. Thanks to its low viscosity and surface tension, it is increasingly used in natural cosmetics. The compound convinces with its excellent wetting of pigments. The same applies to mineral sun protection formulations. The ester oil is based entirely on renewable sources and is produced in a unique eco-efficient process.

Pentylene Glycol: Pentylene Glycol is the ideal multifunctional ingredient that boosts the performance of active ingredients, moisturizes the skin, improves the sensorial profile of formulas and enhances product protection. Pentylene glycol natural is a polyvalent alcohol and has to bind therefore the quality water. This quality can be used to supply humidity to the skin. The skin is better soaked, looks clearly beaming and feels better.

Prunus Armeniaca Kernel Oil: Apricot Kernel Oil skin benefits are many; an antioxidant-rich oil, its application aids in the protection from free radicals. Apricot Oil for skin contains a high content of Vitamin A which helps stimulate cell turnover, plumping the skin and reducing the appearance of fine lines and wrinkles.

Stearic Acid: Stearic Acid is an anionic oil-in-water emulsifier which is characterised by its good skin compatibility.

Cetearyl Glucoside: is a non-ionic, BDIH and Ecocert-comfort O/W emulsifier based on *Cetearyl alcohol*, i.e. a mixture of Cetyl and Cetearyl alcohol and Cetearyl Glucoside. It is not irritating, non-comedogenic and is self-emulsifying.

Sodium Hyaluronate: Sodium hyaluronate is usually used for anti-aging and moisturizing because of its ability to improve firmness levels, smooth out fine lines, and hydrate the skin. You can find sodium hyaluronate in many products, including serums and moisturizers. It is also possible to take it as an oral supplement. We use low- and ultra-low-molecular weight hyaluronic acid.

Artemisia Annuua Extract: see webpage 72k.com

Butyrospermum Parkii Butter: Sheabutter is extracted from the fruits of the Karité tree. It regulates the moisture content of the skin and has a refatting, calming and smoothing effect. Shea butter is a high-quality, excellently tolerated, versatile raw material. Due to the proportion of unsaponifiables, the lipid barrier is strengthened and this butter is therefore predestined for the treatment of dry, neurodermitic and barrier-disturbed skin. It is very well tolerated and can also be used pure. In formulations, it provides consistency and results in smooth creams that are very well absorbed.

Tocopherol: is used as an antioxidant for fats and oils for the purpose of stabilization for cosmetic applications.

Helianthus Annuus Seed Oil: sunflower seed oil – mainly used as the carrier oil for the Tocopherol

Glyceryl Stearate Se: is a versatile O/W emulsifier based on vegetable raw materials. This anionic emulsifier can be used in a wide range of products. It creates light, smooth emulsions that produce a distinctly moist skin feel. Creams and lotions with Glyceryl Stearate SE are absorbed very well and leave no greasy shine.

Glyceryl Stearate Citrate: This anionic emulsifier can be used in a wide range of products. It creates light, smooth emulsions that produce a distinctly moist skin feel.

Cetearyl Alcohol: is a non-ionic, BDIH and Ecocert-comfort O/W emulsifier based on *Cetearyl alcohol*, i.e. a mixture of Cetyl and Cetearyl alcohol and *Cetearyl Glucoside*. It is not irritating, non-comedogenic and is self-emulsifying.

Cetyl Alcohol: can bind water very well and supports emulsion formation. Because of this property, it is often used as a consistency enhancer and co-emulsifier. Cetyl alcohol makes emulsions firmer, but can still be applied very well on the skin.

Alumina: Alumina is the common name of the ingredient aluminum oxide. It is a naturally occurring mineral used as an abrasive, a thickener, and an absorbent in cosmetics. Alumina is sometimes used as part a coating blend for nano-and micro-sized mineral UV filters such as titanium dioxide and zinc oxide. This coating keeps the very fine power particles of the mineral sunscreen on skin's surface since the coating materials are a larger molecular size. These coating blends also improve the aesthetics and even application of mineral sunscreen ingredients.

Fragrance (Parfum): essential oil in organic quality

Xanthan Gum: 100% natural viscosity regulator

Lactic Acid: pH regulation. Lactic acid is an acidifier with moisturising, exfoliation and antibacterial properties. This natural L-lactic acid is produced from sugar by fermentation.

Potassium Sorbate: Potassium sorbate is a nature-identical preservative. It is ideal for use in face and body care.

Alcohol: We use exclusively plant derived organic alcohol. We use alcohol as an extraction agent in the Artemisia Annu Extract.

VIOCAP 72k Product Line

INCI's

Date: 06.12.2023

72k sun SPF 50+ tinted

Ingredients (INCI):

Aqua, Caprylic/Capric Triglyceride*, Glycerin, Diethylamino Hydroxybenzoyl Hexyl Benzoate, Zinc Oxide, Pentylene Glycol, Ethylhexyl Triazone, Diethylhexyl Butamido Triazone, Bis-Ethylhexyloxyphenol Methoxyphenyl Triazine, Isoamyl Laurate, Titanium Dioxide, Cetearyl Glucoside, Polyhydroxystearic Acid, Butyrospermum Parkii Butter*, Artemisia Annuua Extract*, Sodium Hyaluronate, Tocopherol, Cetearyl Alcohol, Stearic Acid, Glyceryl Stearate, Glyceryl Stearate Citrate, Cetyl Alcohol, Helianthus Annuus Seed Oil, Fragrance (Parfum), Alcohol, Xanthan Gum, Alumina, Potassium Sorbate, Lactic Acid, [+/- CI 77491, CI 77492, CI 77499]

* certified organic

Explanation to the ingredients:

Aqua: We exclusively use water from the 'Adelboden' mineral springs. It's one of the highest springs in Europe, in the heart of the Swiss Alps. Our mineral water springs up far away from any environmental influences after a journey of several years through the rock layers of the untouched mountain world of the Swiss-Alps.

Caprylic/Capric Triglyceride: is known as neutral oil. The liquid oil is colorless and odorless and consists of the medium-chain fatty acids caprylic acid and capric acid. The oil is made from coconut fat. It is organic certified and NATRUE conform. Caprylic/Capric Triglyceride is an oxidatively stable and non-irritating oil with good spreading properties. It improves the application behavior of emulsions, is well absorbed and prevents heavy greasing. It's very suitable for irritated and sensitive skin and is used for skin care products, sun care and decorative cosmetics.

Diethylamino Hydroxybenzoyl Hexyl Benzoate: Synthetic UV-filter

Glycerin: Our Glycerin is plant derived and of organic quality. Glycerin is a humectant for creams and lotions. It conveys a pleasant, soft skin feeling. We use Glycerin also as an extraction agent in our Artemisia Annuua Extract.

Zinc Oxide: Zinc oxide is an active ingredient found in sunscreens, used to treat itching, skin infections, chapped skin, and skin conditions. Besides, it has great wound healing capabilities too.

viocap

Pentylene Glycol: Pentylene Glycol is the ideal multifunctional ingredient that boosts the performance of active ingredients, moisturizes the skin, improves the sensorial profile of formulas and enhances product protection. Pentylene glycol natural is a polyvalent alcohol and has to bind therefore the quality water. This quality can be used to supply humidity to the skin. The skin is better soaked, looks clearly beaming and feels better.

Ethylhexyl Triazone: Synthetic UV-filter

Diethylhexyl Butamido Triazone: Synthetic UV-filter

Bis-Ethylhexyloxyphenol Methoxyphenyl Triazine: Synthetic UV-filter

Isoamyl Laurate: is a highly spreadable, light emollient for natural formulations with a light, non-sticky skin feel. Thanks to its low viscosity and surface tension, it is increasingly used in natural cosmetics. The compound convinces with its excellent wetting of pigments. The same applies to mineral sun protection formulations. The ester oil is based entirely on renewable sources and is produced in a unique eco-efficient process.

Titanium Dioxide: Titanium dioxide is an inert earth mineral used as a thickening, opacifying, and sunscreen ingredient in cosmetics. It protects skin from UVA and UVB radiation and is considered non-risky in terms of skin sensitivity.

Cetearyl Glucoside: is a non-ionic, BDIH and Ecocert-comfort O/W emulsifier based on *Cetearyl alcohol*, i.e. a mixture of Cetyl and Cetearyl alcohol and Cetearyl Glucoside. It is not irritating, non-comedogenic and is self-emulsifying.

Polyhydroxystearic Acid: It maintains and reinforces the lipid barrier. It also retains moisture in the skin and makes it appear more soft, smooth, and healthy. It is also used in sunscreens to coat the oxide particles. It also helps in the proper dispersion of sunscreen when applied on the skin and increases its effectiveness.

Butyrospermum Parkii Butter: Sheabutter is extracted from the fruits of the Karité tree. It regulates the moisture content of the skin and has a refatting, calming and smoothing effect. Shea butter is a high-quality, excellently tolerated, versatile raw material. Due to the proportion of unsaponifiables, the lipid barrier is strengthened and this butter is therefore predestined for the treatment of dry, neurodermitic and barrier-disturbed skin. It is very well tolerated and can also be used pure. In formulations, it provides consistency and results in smooth creams that are very well absorbed.

Sodium Hyaluronate: Sodium hyaluronate is usually used for anti-aging and moisturizing because of its ability to improve firmness levels, smooth out fine lines, and hydrate the skin. You can find sodium hyaluronate in many products, including serums and moisturizers. It is also possible to take it as an oral supplement. We use low- and ultra-low-molecular weight hyaluronic acid.

Tocopherol: is used as an antioxidant for fats and oils for the purpose of stabilization for cosmetic applications.

Glyceryl Stearate Se: is a versatile O/W emulsifier based on vegetable raw materials. This anionic emulsifier can be used in a wide range of products. It creates light, smooth emulsions that produce a distinctly moist skin feel. Creams and lotions with Glyceryl Stearate SE are absorbed very well and leave no greasy shine.

Stearic Acid: Stearic Acid is an anionic oil-in-water emulsifier which is characterised by its good skin compatibility.

Glyceryl Stearate Citrate: This anionic emulsifier can be used in a wide range of products. It creates light, smooth emulsions that produce a distinctly moist skin feel.

Helianthus Annuus Seed Oil: sunflower seed oil – mainly used as the carrier oil for the Tocopherol

Cetearyl Glucoside: is a non-ionic, BDIH and Ecocert-comfort O/W emulsifier based on *Cetearyl alcohol*, i.e. a mixture of Cetyl and Cetearyl alcohol and Cetearyl Glucoside. It is not irritating, non-comedogenic and is self-emulsifying.

Cetyl Alcohol: can bind water very well and supports emulsion formation. Because of this property, it is often used as a consistency enhancer and co-emulsifier. Cetyl alcohol makes emulsions firmer, but can still be applied very well on the skin.
